### WHITE PAPER How to master Europe's digital infrastructure needs?

Stand vom 21.08.2024 16:50:12 bis 21.08.2024 16:58:49

#### Angegeben von:

eco - Verband der Internetwirtschaft e.V. (R002737) am 21.08.2024

#### Beschreibung:

The White Paper poses the question of how to meet the future demand for digital infrastructures and services. This question is crucial, not least regarding the requirements for Europe's future performance and competitiveness in terms of AI development and application. In addition to ensuring the efficacy of competition within the EU, forthcoming regulatory initiatives should also safeguard the enduring competitiveness of European digital infrastructures in the global market environment. eco recommends the inclusion of proactive supportive measures aimed at the entire digital infrastructure value chain by increasing demand for and driving investment in digital infrastructure.
