Suggestions for regulatory changes to enable the scaling of DLT-based capital markets

Aktuell seit 29.04.2026 17:30:15

Angegeben von:

Association for Financial Markets in Europe (AFME) (R001235) am 18.12.2024

Beschreibung:

The advent and advancement of distributed ledger technology (DLT) systems have created the opportunity for the EU to lead the world in building the capital markets and economy of the future, based on DLT and a network approach that in this submission we refer to as Technology Financial Infrastructure (TFI). As capital markets are a key link in the tokenised economy as well as a key driver of DLT-based innovation, urgent action is proposed to ensure that the EU capital markets regulatory framework provides a sustainable basis for a transition towards TFI.
