Beschreibung:

The European Commission consultation on the EU securitisation framework states that "While the 2019 framework and its subsequent amendments improved transparency and standardisation in the securitisation market, stakeholder feedback gathered in preparation of the Commission report on the functioning of the Securitisation Regulation, and subsequent stakeholder engagement, indicates that issuance and investment barriers remain high, impeding the EU from fully reaping the benefits that securitisation can offer. Originators and investors argue that issuance and investment barriers are partly driven by the conservativeness of specific aspects of the regulatory framework, such as transparency and due diligence requirements, as well as the capital and liquidity treatment of securitisations."
